## WORK EXPERIENCE

### All Florida Home Inspections

2017 - Present

*Licensed Home Inspector*

- Schedule and perform 4 point, Wind Mitigation, and Residential home Inspections.
- Provide detailed and thorough explanations on inspection reports using inspection report software.
- Communicate inspection findings to customers, insurance agents and real estate professionals.

### Beastly

June 2015 - Dec 2016

*Web Application Developer*

- Implemented best design practices to ensure consistent user experience on any device.
- Translated UI wireframes and mockups to visual elements of various applications.
- Built front-end components for various applications in HTML, CSS, Javascript, Jquery and React.
- Built a database management tool using Rails that integrated the LocomotiveCMS engine to allow for custom content management.
- Fixed bugs with periodic code reviews with the senior developer following the agile methodology.
- Wrote feature tests using Rspec, Capybara, and selenium.

### School of interactive Design

Dec 2014 - May 2015

*Web Application Developer*

- Built and maintained a Ruby on Rails application for an online game development school.
- Developed the front-end utilizing designs provided to me and technologies including HTML/CSS, Javascript, and Jquery.
- Migrated legacy users from a Wordpress php website by coding a custom class function to read and re-format SHA256 password encryption.
- Integrated paypal for customer payments and created a dashboard for administrative control of all database records.
